

CONCENTRATE

FOR POOR WATER QUALITY AND ODORS

AVAILABLE IN 5 GALLON TOTE OR A 6 X 1 CASE

**DOES YOUR LAKE SMELL? IS MUCK
BUILD-UP REDUCING THE DEPTH OF
YOUR LAKE? LOOKING FOR AN ALL-
NATURAL WAY TO KEEP YOUR LAKE
HEALTHY?**

Micro-Lyfe Concentrate is an economical solution to your basic bioaugmentation needs. Choose this ultra-concentrated culture of 4 spore-forming bacteria to reduce the buildup of sludge and odor while speeding the removal of harmful ammonia and nitrite. Every gallon of Micro-Lyfe Concentrate contains 12 trillion microorganisms!

DIRECTIONS:

Shake well before using. Depending on water quality, apply 0.5-1.0 gallon per acre for the initial monthly treatment followed by 0.25-1.0 gallon per acre per month there-after.

To apply, pour slowly from container directly into the lake along the entire perimeter or dilute with non-chlorinated water to attain even coverage.

If any copper based algacides, herbicides, Hydrothol 191 or peroxide products are used to treat algae or aquatic weeds apply Micro-Lyfe Concentrate at least 72 hours before or 72 hours after those applications. Never add Micro-Lyfe Concentrate to a spray tank that has previously held any copper compounds.

- 1** Super concentrated with 12 thousand billion microorganisms per gallon
- 2** Accelerates nitrogen cycling reducing toxic ammonia and nitrite levels
- 3** Helps control organic matter and sludge buildup
- 4** Different blend of bacteria than Micro-Lyfe Complete
- 5** Very affordable, cost effective monthly application

CAUTION:

- Keep out of reach of children
- Do not use internally
- If contact is made with open wounds, wash with soap and water
