

Lighting & Controls

Timers & Controls

The Power Control Center allows water gardeners the flexibility of installing a pond where electricity is far from the pond site. Now you can control the operation of your pumps, UV clarifiers, underwater lights, and other necessary items with the Power Control Center. The ultimate luxury to power your pond. We also offer basic 12 Volt transformers with timers for your lighting control needs.

PC50

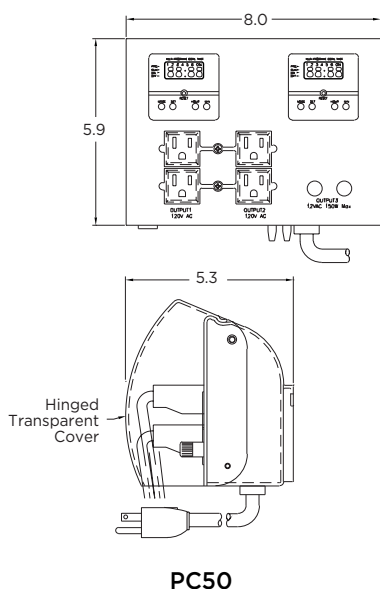

- 150 Watt 12 VAC
- Adjustable on/off timer
- Digital timers control both line voltage and low voltage
- Fuse protected
- 10 amp max on 110 V side
- 150 Watt max on 12 V side

TRT150

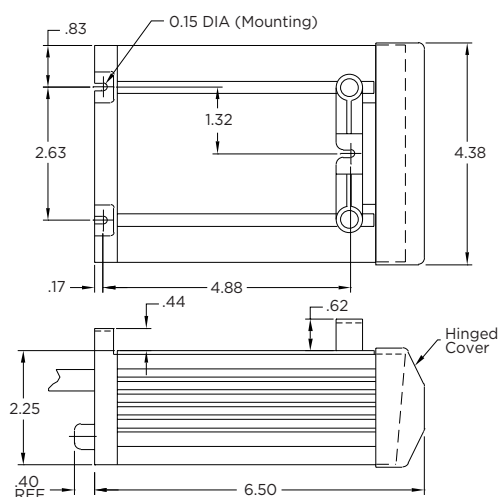

- 150 Watt 12 VAC
- Adjustable on/off timer
- Digital display
